

Ecofender™ Snake and Reptile Fences

Our Ecofender™ Snake Fences are designed to keep grass snakes and other small reptiles out of the dangers construction sites may pose.

Our Ecofender™ snake fence comes in two heights; 1.2m for our 1mm HDPE and 1.22m for our Ecofender™ Blue.

Our 1mm HDPE comes in a 75m length, while our Ecofender™ Blue comes in a 100m length. This results in joins being less often thus resulting in less areas of weakness, as well as efficiency of installation being increased.

Our 1mm HDPE is UV Stabilised, with the additional bonus of it being manufactured from recycled plastic.

Our Ecofender™ Blue is a non UV, coated both sides, woven fence.

For life expectancy, our 1mm HDPE has a life expectancy of up to 5 years, while the Ecofender™ Blue carries a life of up to 3-5 years.

Features/Benefits (1mm HDPE):

- UV Stabilised
- Up to 5 Years Life Expectancy
- Flat Panel Creased 50mm from Top and 100mm from Base
- Protects Amphibians and Reptiles from Entering Hazardous Areas
- Made from Recycled Plastic

Features/Benefits (Ecofender™ Blue):

- Up to 3-5 Years Life Expectancy
- Coated Both Sides
- Protects Amphibians and Reptiles from Entering Hazardous Areas
- Reinforced Woven Fence

Feature	1mm HDPE	Ecofender™ Blue
Life Expectancy	Up to 5 Years	Up to 3-5 Years
Thickness	1mm	-
Material	Black regran UV HDPE	Reinforced woven (Coated both sides)
Cross Section	Flat sheet creased 50mm from top and 100mm from base	-
Reel Size / Roll Size	1,200mm x 75m x 1mm	1.22m x 100.00m
Weight	87kg per reel	22Kg per roll

Application Categories: Wildlife Protection
